Marsden B-100: A truly waterproof weighing solution

The 'Super SS' **stainless steel B-100 Bench Scale** is built to withstand the harshest of working conditions - humid, damp or wet. And with **high accuracy**, check weighing/parts counting functions and an attractive price tag, it has become our **best selling bench scale**.

Complete water protection

The B-100 is **fully waterproof** - this has made it a popular choice for food industries where weighing scales need to cope with getting wet on a regular basis. **Stainless steel casing** and fully encapsulated load cell, **rechargeable battery** and dual displays ensure **complete water protection**.

Take it absolutely anywhere

An internal rechargeable battery provides at least **40 hours of continuous use** - and if you need mains power, there's a mains power lead stored away in a neat compartment underneath the scale. The B-100 is also **compact and robust** - protected again by that brushed stainless steel casing.

Protective stops prevent overloading

The B-100 is **shock-proof** and protected from overloading by stops under each load cell. But with **capacities up to 30kg available**, there should always be a B-100 Bench Scale capable of meeting your needs.

Key features

- Brushed stainless steel housing
- Overload protection
- Waterproof
- Parts counting feature
- Battery charge indicator
- Hi/lo alarm
- Tare
- Zero
- Auto power-off

Bold, bright displays front and rear

15mm high digits display weight readings brightly and clearly on the front and rear LCD displays. It means weight readings can be seen from a distance, and in poor lighting conditions.
