

The world's N°1
wrapping solution.

ELIXA XP14

The automatic packaging machine model **Elixa XP14**, the entry-level machine from the Elixa series, uses super stretch Elixa technology for the packaging of meat, fish, fruit, vegetables and gastronomy. The use of one width film reel of 280 mm and the automatic reading of the format makes it particularly suitable for small retail outlets and for those who decide to shift from manual to automatic wrapping with a small investment. The frontal configuration of the machine is compact and of small dimensions even when integrated with manual weight-price labelling devices.

Main characteristics

Automatic reading of the dimensions of the tray.	No programming is required by the operator: fast and intuitive learning of the operation by the machine. 100 % easy to use!
One width film reel of 280 mm.	Use of one width film reel for all products that can be packaged. Thanks to Elixa technology, XP14 can allow for film saving up to 20% compared to traditional packaging machines.
Plug and Pack!	Elixa XP14 is powered by 230 V without any need for compressed air.
Compactness and dimensions: less than 1m²!	Can be placed in any work environment, optimising the available spaces.
Integration with the most common manual weight-price labelling devices (PWL).	Elixa XP14 can be integrated optimally with the major weight-price labelling systems produced by Bizerba, CGM, Mettler-Toledo and others.
Livelli produttivi elevatissimi.	Fino a 20 confezioni al minuto: prestazioni che appartengono a confezionatrici di fascia superiore.
Ideal for packaging Fresh and Very Fresh products.	Meat, fish, vegetable, gastronomy and cheese.
Super customisation options.	With a wide choice of options such as extended in-feed conveyors, exit conveyor rollers, the machine can be easily customised according to customer requirements.
Reel replacement in less than 30 seconds!	Reel change is fast and easy, without errors.
Wrapping of the tray is always optimal.	The product is packaged with particular attention to the sealing of the tray underside, thanks to the optimised length of the sealing belt.
Safety and hygiene before anything else.	Each part of Elixa XP14 has been designed in compliance with the most severe regulations for the safety of the operator. In addition, the rounded design of the safety guard eliminates accidental impact during movement in the vicinity of the packaging machine. Sliding of any drops of liquid are prevented from entering into the interstices due to the particular design of the upper hood.

14 Speed.
Up to 14 packages a minute.

22 Optional features from the list.

30 Seconds to change the reel.

120 Min tray format. (LxWxH mm)
120 x 100 x 10*.

170 Weight
170kg.

280 Stretch film.
One width of 280 mm.

350 Max tray format. (LxWxH mm)
350 x 230 x 160*.

1980 Power requirements
1980 VA.

*It is not possible to achieve the three maximum dimensions of the tray at the same time. Gruppo Fabbri Vignola reserves the right to modify the specifics of its products without prior notice. Gruppo Fabbri Vignola guarantees quick, efficient and widespread technical assistance, thanks to a team of qualified and multi-lingual professionals, always at the disposal of customers.
