TECHNICAL AND FUNCTIONAL FEATURES

Worktop, front and side panels made of AISI 304 stainless steel. Inside made of stainless steel. Incoloy stainless steel resistances positioned below the cooking plate. Thermostatic control and safety thermostat with manual restart. Temperature regulation from 50° C to 270° C. Power indicator and temperature light. Smooth satin finish steel plate of high thickness occupying the entire worktop surface splash guard. Slightly inclined cooking surface with a largely sized drain hole and conveyor to a proper container. Large compartment completely in steel.
