Data Sheet
SC II 100 and SC II 100 7"

BIZERBA

The System Class brings together all the necessary features for efficient performance. Its model versions allow many solutions which are characterized by their attributes: technically sophisticated, suitable for a broad weight range and easy to operate.

Product description

The Bizerba System Class family is impressive in terms of its broad range of applications. Due to its various model versions it can be used for all retail tasks: weighing, transactions, printing, labeling as well as presenting advertising content with some models. The SC II models can be operated and cleaned easily.
Furthermore, they save energy – but not at the expense of performance.

The counter top scale SC II 100 is ideally suitable for assisted sales and price labeling. Combined with a cash register drawer it becomes a high-performance checkout solution. Alternatively expanded by a separate load receptor it is perfectly suitable for goods receiving and commissioning tasks. As a separate version it also reliably provides accurate results in case of wider and heaver loads. By means of special advertising effects on the optional 7" customer display it offers attractive added value for customers.

SC II 100 operator side

Highlights

– 7" LCD customer display*: presentation of full screen and permanent advertising, cross-selling or article information
– High performance label printer, also suitable for receipt operation
– For mobile trade - operation via internal battery pack* or external battery connection*
– Freely configurable keyboards for flexible operating procedures
– Microsoft operating system with fast processor
– Interfaces for combination with further modules:
  e.g. cash register drawer, separate load receptor, scanner
– Extra software functions per modules*:
  e.g. cash register function, scanning, Electronic Cash, operator time recording
– Communication with the back office via Ethernet or WLAN*
– Remote update capability
– Connection of external load receptors*

SC II 100 with 7" customer display

*Options
