

Main features and benefits

Modular base

Allows installation on wheels, feet, fixed or mobile plinth.

75 mm insulation thickness

CFC/HCFC FREE insulation for improved thermal efficiency.

Door locks and stops

Reversible door with lock and self-closes below 105° and stays open above 105°.

Replaceable gaskets with high performance insulating

Triple chamber geometry with innovative D7 compound, which produces 35% higher insulation efficiency than traditional models.

Pedal opening system

The system allows hands-free access to the capacious interior and facilitates the insertion of trays and heavy containers. (Optional)

Evaporation at zero cost

The water produced by the defrosts evaporates automatically thanks to the heat produced by the cooling system.

Intelligent ventilation

Fans stop automatically when the door is opened to avoid the intake of hot air from outside and to reduce energy consumption.

Racks and slides

Removable stainless steel racks, without the need for tools.

Other characteristics

Exterior and interior in AISI 304 Cr-Ni 18/10 stainless steel. Back and technical compartment in galvanized steel

Coated evaporator anti-corrosion. Cover evaporator in foodsafe professional stainless steel AISI 304

Temperature and door open alarms

Internal and external radiused corners easy to clean

Forced air refrigeration

LED lighting

Door frame with anti-condensation system (only models -18°-22°C)

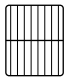

Hot gas defrosting (Plug-In), off cycle automatic (0°+10°C), electric (Remote)

Cosmo wi-fi monitor system (optional) and MODBUS-RT connection

Eco-friendly refrigerant R290 GWP=3

Designed to operate efficiently in climate class 5 (stainless steel door), 4 (glass doors)

Plug-In and Remote versions
