Main features and benefits

Design
Simple to operate control panel for easy temperature adjustment.

Tempered glass
The high-strength tempered glass protects food by offering a comfortable work surface.

Wall fixing kit
The display case can be fixed to the wall, and is combined with counters with a stainless steel top for a wide variety of positions.

Feet fixing kit
The height-adjustable feet allow the display cabinet to be placed on refrigerated counters and worktops.

Technical compartment
Engine, right or left side, plug-in or remote.

Water drain
The water drain plug at the bottom of the panholder facilitates cleaning and drainage of water following defrosting and cleaning.

Compartment inspection
The technical compartment can be inspected for maintenance and cleaning purposes.

Cooling
The technical compartment ventilator takes the air in from the front and expels it from the rear or the side.

Other characteristics

External and internal body is made of steel AISI 304

CFC/HCFC FREE, insulation thickness: 30 mm

Internal and external radiused corners easy to clean

Stainless steel lid AISI 304 (optional)

Depth 322 mm for GN1/4 containers

Depth 380 mm for GN1/3 containers

Eco-friendly refrigerant R290 GWP=3

Designed to operate efficiently in climate class 5

MODBUS-RT connection

Cosmo wi-fi monitor system (optional)

Display case for ingredients
