

Main features and benefits

Modular base

Allows installation on wheels, feet, fixed or mobile base.

Electronic expansion valve

Regulates the quantity of the refrigerant fluid injected, improving performance by 25% and reducing consumption.

Replaceable gaskets with high performance insulation

Triple chamber geometry with innovative D7 compound, which grants 35% higher insulation efficiency than traditional models.

Air flow circulation conveyor

The innovative air circulation system envelops the food while reducing the time of the cooling cycle.

Easy maintenance

The quick release system for the front panel allows the condenser battery to be cleaned quickly, ensuring that its performance over time remains constant.

Ventilation panel opening

The evaporator is easy to inspect. Its quick release system makes cleaning and maintenance easy.

Slides and racks

Racks with positioning holes allow easy repositioning of the slides for EN60x40 and GN1/1 (excluded models L 710 mm).

Core probe

Developed with an exclusive ergonomic design, it can be easily dismantled and replaced thanks to a simple connector. Multipoint or heated optional.

Other characteristics

External and internal body is made of steel AISI 304

CFC/HCFC FREE, insulation thickness: 60 mm

Touch screen 4.3" with USB socket

Removable stainless steel racks without the need for tools

Hot gas defrosting (Plug-In), forced air (Remote)

Variable air flow condenser

Anti-corrosion painted evaporator

Door frame with anti-condensation system

Designed to operate efficiently in climate class 5

MODBUS-RT connection

Cosmo wi-fi supervision system

Plug-In and Remote versions
