

At Comenda we produce a wide range of racks and inserts.

Comenda racks feature an open design that provides proper spacing for glasses and crockery to allow optimum water penetration. The outcome is a more thorough cleaning with rapid drying and enhanced glass protection to reduce damage and breakage.

They are the perfect ally to guarantee outstanding washing results and solve storage problems!

FEATURES

Robustness

- Racks are manufactured in polypropylene, steel or iron laminated. They high temperatures and the most aggressive detergents.
- They do not require any maintenance.

Ergonomics

- Handles at the sides to load racks

Safety

- Dividers to avoid breakages, marking and chipping of crockery

Maximum Hygiene

- **Perforated reinforced corners** to avoid depositing of food residues ensure hygienic racks.
- **Wide openings at sides** and on the bottom to allow correct penetration of water.
