New colander for VarioCooking Center MULTIFICIENCY® 211/311

The draining colander for the VarioCooking Center MULTIFICIENCY® has been improved. It can be fixed directly to the edge of the pan and allows the food to be separated from the liquid faster.

Colander 211 article **60.71.761**

Colander 311 article **60.72.034**

The new colanders supersede articles **60.70.809** and **60.70.810**, which are only suitable for MULTIFICIENCY units.

The old colanders can still be ordered for the old generation of units.
